

## TEEBAGRIFOOD UGANDA SCOPING WORKSHOP

Join us for the first TEEBAgriFood Uganda workshop to further discuss the project and policy scope, obtain wider feedback, and identify partner organisations. The event will feed into the wider development of the new TEEBAgriFood Uganda study, as prefaced by its launch at the TEEBAgriFood Africa and Georgia Regional Symposium in February 2021.

The TEEBAgriFood programme aims to assess the true costs of agriculture, making visible the impacts and dependencies of the agri-food value chain on nature, and mainstream the values of biodiversity and ecosystem services into public sector and private sector decision-making.
